Detailed analysis of accumulated losses

Date	15/04/2025
Name of the Listed Company	Insurance House PJSC
Define the period of the financial statements	Q4 2024
Accumulated losses	AED 140,407,541
Accumulated losses to capital ratio	118.2%
The main reasons leading to these accumulated losses and their history	1. The IH Motor Book of Business developed in 2022 and H1 2023 has been identified as a key contributor to the company's losses in the last 2 years; this was driven by the aggressive market price competition together with unusually high acquisition costs, poor reporting, and claim management practices. 2. Financial reporting, control issues, and accounting errors related to the period between 2020 and 2022 led to the late realization of losses and a delayed management response.
Measures to be taken to address accumulated losses:	A detailed recovery plan was submitted in Q1 2025 covering the following key areas: 1. Raising fresh capital to restore solvency status per the Central Bank's requirements and improve liquidity to service existing liabilities. 2. Developing a new strategy for motor and health insurance businesses to reverse the trend at each of the top line and bottom-line levels driven by key initiatives at regular rate review exercises, risk selection, claim management, and efficient reporting capabilities for key performance and early warning indicators.
